Watch 2.0

Discreetly view alerts for text messages, email, social-media correspondence and calendar events right on your wrist with the new Bluetooth-connected **COOKOO** watch. The water-resistant device also lets users tag their location, take photos, or find misplaced smartphones or tablets. Available in several colors, the Cookoo runs on replaceable analog watch batteries that last up to a year. Donors supported the Cookoo through the social-funding site Kickstarter, and the first orders will ship this fall. *\$100 to \$130, www.cookoowatch.com* —RENEE BRINCKS
